

Introducing...

RedVector

Where Smart People Learn™

Changing the world through revolutionary technology solutions that save lives, inspire professionals and elevate performance.

We have partnered with **RedVector**, one of North America's top Industrial Skills training providers, to establish a Master Service Agreement and integrate their content in Solvay's Global Learning Management System, **YOUGrow**, for a seamless learning experience. RedVector is a sanctioned OSHA provider, continuously acquiring and refining their content to meet compliance requirements.

This is a unique opportunity to opt-in and help standardize training across our region. One license is required for each employee accessing the content; sites will be reinvoiced quarterly based on usage by the Learning Team. Learn more about the many benefits including significantly reducing the cost of training for each employee...

Master Service Agreement Highlights

- Full access to RedVector's [Industrial Premium Library](#) including 1500+ HSE, Industrial Maintenance, and Process Operations Courses
- Competitive, Tiered Pricing Model ranging from \$175 > \$105 per learner annually
- Supplemental [OSHA Content](#) Available
- Flexible Access — opt-in when the time is right for you with no long term commitment
- Site Administrator Training Services
- Access to RedVector's Custom Course Builder
- *Coming Soon!* Content accessible via YOUTGrow utilizing Single Sign On in 2020

Health, Safety & Environment Library

RedVector offers interactive online safety training courses that address the most common hazardous situations faced in a variety of environments. From our popular OSHA 10-hour construction course to our Lockout/Tagout or Fall Protection training, we deliver in-depth safety training with engaging instructional design and video.

Did You Know?
There were approximately **2.9 million** nonfatal workplace injuries and illnesses reported by private industry employers in 2016, which occurred at a rate of **2.9 cases** per 100 full-time equivalent (FTE) workers.
— BLS

Essential Training Topics
Employees can learn to recognize and prevent at-risk conditions or behavior before they lead to an incident, and managers can track course completion progress to ensure safety awareness is continuously improving.

- Active Shooter Training
- Bloodborne Pathogens
- Chemical Safety
- Confined Spaces
- Construction Safety
- OSHA 10 Hour
- Crane / Forklift Training
- Driving Safety
- Electrical Safety
- Environment & Hazardous Materials
- Ergonomics / Back Safety
- Fall Protection
- Fire / Emergency
- Hazard Communication
- HAZWOPER
- Personal Protective Equipment
- Process Safety Management (PSM)
- Regulatory Protection
- Safety Compliance
- Safety Management
- Welding Safety
- Restaurant & Hospitality Safety & Compliance

HSE Library

RedVector offers interactive online safety training courses that address the most common hazardous situations faced in a variety of environments. From our popular OSHA 10-hour construction course to our Lockout/Tagout or Fall Protection training, we deliver in-depth safety training with engaging instructional design and video.

Industrial Maintenance Curriculum

Use RedVector's online maintenance training to ensure your maintenance professionals have the required knowledge and skills to keep equipment in safe, working order. Plus, improve performance and reduce downtime with our best-in-class preventative maintenance training programs.

Designed for Maximum Retention
Increase learners in virtual scenarios using powerful 3D animation and models. From Total Productive Maintenance (TPM) training and essential plant maintenance courses, we offer your team members the information they'll need to succeed.

JUST ADDED
Principles of Manufacturing Series
• Consistent Methodology
• General Troubleshooting Strategies
• Industrial Housekeeping
• Meeting Customer Expectations
• Operator Risk Case
• Problem Solving Strategies
• Understanding Facility Costs

Overview
Enhance essential knowledge of theory, systems, equipment, instrumentation, conditions and safety procedures.

- 400+ courses
- Powerful 3D animations & models
- Assessments & in-course tests
- Regular updates

Essential Training Topics
With engaging, interactive training content, have peace of mind that your employees are up to date with maintenance best practices.

- Plant Maintenance
- Maintenance and Reliability
- SE
- Total Productive Maintenance (TPM)
- Electrical Maintenance
- Mechanical Maintenance
- Hydraulics and Pneumatics
- Measurement and Sensors
- Instrumentation
- Troubleshooting
- Safety
- Equipment and Tools
- Heat Exchangers
- Pipes and Valves
- Shafts
- Pumps
- Vibration
- Compressors
- Electrical/NEC
- Quality Issues
- Troubleshooting
- Safety

Industrial Maintenance Curriculum

Use RedVector's online maintenance training to ensure your maintenance professionals have the required knowledge and skills to keep equipment in safe, working order.

Plus, improve performance and reduce downtime with our best-in-class preventative maintenance training programs.

Process Operations Curriculum

The success of any operation is based on three essentials – efficiency, productivity and safety. To reduce risk and increase productivity, companies must certify that operators have the required knowledge and skills to carry out their duties safely and efficiently, and ensure that all equipment is in safe working order.

Overview
Improving performance starts with people. So let RedVector help accelerate your process operator training.

- 75+ courses
- Deliver essential lessons on theory, systems, equipment, instrumentation and conditions
- Improve safety and enhance productivity
- Enhance operator knowledge and skills

Essential Training Topics
With engaging, interactive training content, have peace of mind that your employees are up to date with operator best practice, new technologies, safety standards and more. Courses are designed to put the student 'on location' in real situational examples.

- Plant Equipment and Operations
- System Operations
- Process Plant Safety Considerations
- Operator Responsibilities
- Working Conditions
- Foundational Technical Information
- Plant Production
- Electrical
- Statistical Process Control
- Diagrams and Blueprints
